More information

The Talens website is packed with information on all types of Decorfin paint and related products. You can find us at www.talens.com. In addition there are leaflets on the other Decorfin paint types: Glass, Porcelain and Textile. You will also find in the Decorfin range products for special effects like Antique Colour and Patina.

Decorfin

CREATE
YOUR WORLD

Universal Satin
Universal Gloss

Ready to use!

A decorating paint with infinite possibilities. A paint that is easy to use and guarantees good lightfastness (it won't fade) and durability. The paint can be used immediately and the colours are ideal for mixing together. There is a wide choice from 62 colours. Decorfin paint types are so co-ordinated that attractive colour combinations are possible.

Features

- A water-based acrylic paint that is waterproof when dry. These advantages make Universal Satin a durable paint that can be used both indoors and outdoors.
- The painted objects can be cleaned with a damp cloth.
- If necessary can be thinned with water for, for example, transparent effects.
- The paint flows pleasantly and evenly, and so is ideal for fast, continuous work.
- Universal Satin is a fast-drying paint (within half an hour). When dry the paint layer has an attractive silk sheen.
- The range includes a number of special metallic colours (such as silver, gold and copper). To preserve their atmospheric glow, these colours are best used pure.

For what surfaces?

- Decorfin Universal Satin can be applied to many kinds of surface. Possibilities include: paper, cardboard, wood, earthenware, stone, plaster of paris and dough figures.
- Smooth surfaces like plastic and metal can also be painted.
- Make sure that the surface is dust and grease-free. Talens Ox-Gall or methylated spirits are excellent for this job.
- For attractive results on highly absorbent surfaces a special white basecoat, Decorfin Primer, is available.

Techniques

- The paint can be used, for example, with a brush. There are special Decorfin Brushes for both finer and coarser work.
- The paint should preferably be applied in 2 thin coats for as smooth and even a result as possible.

Accessories

Working with Decorfin Universal Satin accessories can contribute to a perfect result, such as:
- Decorfin Primer. This white basecoat ensures that the paint does not penetrate too much into an absorbent surface. The primer also gives better paint adhesion. Decorfin Primer dries within approximately 1 hour, after which you can paint the object. Available in a 50-ml bottle.
- Decorfin water-based Varnish Satin. For protecting decorations from dust, damp and dirt. Fast-drying. Gives an attractive even silk sheen. If you prefer a high gloss, use Decorfin Varnish Gloss, also water-based. Available in 50-ml bottles.

- Decorfin Multi Varnish High Gloss. A high-gloss varnish with a crystal-clear, hard protective coat. Drying time is approx. 2 hours. Also ideal for 3D and cut-out techniques. The varnish is resin-based dissolved in white spirit. Clean used brushes with white spirit.
- With Decorfin Crackle Medium you can give painted objects an "antique craquelé" look."

Universal Gloss

Apart from its degree of sheen, this paint has the same properties as Decorfin Universal Satin. When dry the paint layer has a higher sheen. The range consists of 32 colours (see colour chart). The colours are selected from the Universal Satin selection.

- For the best results use special Decorfin stippling brushes series 65. You can clean the stippling brushes with white spirit after use.

Tips

- Close bottles tightly after use and clean tops thoroughly.
- Brushes will remain in good condition for a long time if they are cleaned immediately after use with soap and water. After cleaning place them in an empty jar with the bristles facing upwards.
- If you are not going to use the paint for some time, put a teaspoonful of water in the bottle. This will prevent the paint from drying out.
- Stir the paint well before use.
- For the best painting results with Universal Gloss and Satin use special Decorfin brushes, like series 61 en 62.
